

A.T.O.® SINGLE ENDED PIPE STOPPERS

Available in Oil and Petro-Chemical resistant **Nitrile** coated fabric

Available in **Nomex** Flame retardant covering

This range of Inflatable Single Ended Pipe Stoppers are designed for blanking off ambient air and make an effective seal for purging pipework prior to welding. Once in position, the bag is inflated from a regulated compressed air supply to form a tight seal inside the pipe.

Professional robust solution for purging of stainless steel, duplex and other alloy pipework resulting in shiny, oxide free weld roots.

Easily pushed or pulled into position

Available in a range of specialist fabrics including :-

Nitrile	Oil and Petro-Chemical resistant
Nomex	Flame retardant/Heat resistant
Ceramic Fibre Insulated	Heat resistant to 300 Degrees C

Modular construction for easy storage and cost effective part replacement

Lightweight and collapsible

Sizes available:- 50mm – 900mm (25mm increments)
2" – 36" (1" increments)
Other sizes available on request

Manufactured in the UK.

Standard push fit hose fitting.
Other fittings available on request
