

MECHANICAL PIPE STOPPERS

A range of Mechanical Pipe Stoppers for blanking off ambient air in pipework. Suitable for forming an air tight seal inside the pipe in preparation for purging.

Simply insert the stopper into the pipe, tighten the centre wing nut and the rubber seal will expand forming a seal inside the pipe.

Double seal and chemical resistant seals are available on request.

All the Mechanical stoppers conform to BS8005 for low pressure testing and sealing of pipework systems.

STEEL STOPPERS

Suitable for heavy duty applications

All steel components are zinc plated for corrosion protection.

Sizes 40 – 600 mm (1½" – 24")

Special sizes available on request

ALUMINIUM STOPPERS

Medium to heavy duty applications.

Aluminium plates combine lightness and strength.

Zinc plated steel components for corrosion resistance.

Sizes 40 – 600 mm (1½" – 24")

Special sizes available on request

NYLON STOPPERS

Suitable for light duty applications and small diameter pipework.

Lightweight design.

Sizes 50 – 150 mm (2" – 6")

Special sizes available on request
